

I would like you to reject the National Association of Broadcaster's (NAB's) petition 04-160. I believe that XM Radio and other satellite radio services should be free to offer localized programming such as traffic, weather, and news reports. It seems extremely hypocritical to me to me that companies such as Clear Channel should be allowed to program radio station content remotely and pass it off as local broadcasting, while they and their representative organization, the NAB, is trying to limit XM Radio's right to offer similar kinds of local programming.
